The UNMH will ignore markings of “CONFIDENTIAL” on proposal cover sheets or on every page. Vague designations and blanket statements regarding entire pages or documents are insufficient and shall not bind the UNMHSC to protect the designated matter from disclosure. Do not mark your cover page confidential. Do not put the word “confidential” on every page. Do not identify pricing as confidential.

If you identify any portions of our proposal as confidential or as a trade secret, you agree, by submitting your proposal, that the UNMH’s sole obligation in connection with an IPRA request relating to your proposal is to provide you with notice of the IPRA request so that you may seek relief as you may deem appropriate. UNMH reserves the right to reject any proposal not in compliance with this paragraph.

The UNMH shall not in any way be liable or responsible for the disclosure of any records if they are not plainly marked “CONFIDENTIAL” or “PROPRIETARY” or if disclosure is required by law, regulation, subpoena, order of the court or other legal requirements that purports to compel disclosure, including without limitation, the IPRA.

EXHIBIT A

INTRODUCTION & SCOPE OF SERVICES

Introduction:

The University of New Mexico Hospital (UNMH) is New Mexico's only Level One Trauma Center and academic medical center. UNMH is also the largest clinical component of the University of New Mexico Health Sciences Center (UNMHSC), which includes: Sandoval Regional Medical Center (SRMC), the Children's Hospital, Children's Psychiatric Center (CPC), UNM Psychiatric Center (UNMPC), Mental Health Center (MHC), and Carrie Tingley Hospital (CTH) as well as several other clinics.

In this role, UNMH is recognized for clinical excellence and research in many specialty areas including Trauma and Emergency Medicine, Pediatrics, Orthopedics, Cancer Research and Treatment, and Transplantation. The Hospital and its components provide primary, secondary, tertiary and quaternary care and receive referrals from counties throughout New Mexico and the entire Southwest, allowing the UNMHSC system to expand into underserved areas.

Objective:

UNMH's objective is to ascertain from vendors a comprehensive, full outsourcing service proposal to cover all outpatient clinic and ancillary coding needs for UNM Hospital on a full-time, dedicated basis. This is a first of its kind request; as UNMH has historically and currently only utilizes internal coders and supplemental contract coding for its coding operation. In this regard, vendor would be responsible for providing credentialed contract coding team with designated managerial oversight in accordance with UNMH's quality and performance metrics. At this time, there is no go-live date for this transition, as UNMH is first wanting to ascertain a vendor and then work with said vendor on a proper transition plan.

Outpatient Coding Experience: Coders would be responsible for the accurate assignment of ICD-10-CM diagnosis code(s) and CPT procedural codes for the following facility areas: outpatient clinic (primary care and specialty clinics), as well as assignment of codes for ancillary areas (physical therapy, speech therapy, occupational therapy, audiology, and other ancillary services). Lastly, assignment of Evaluation and Management (E&M) codes and any other outpatient services as rendered to capture professional fee services. At this time, UNMH is transitioning to the SinglePath coding model, whereby coders would be responsible for simultaneously utilizing the 3M coding application to capture both the facility and professional fee components of clinic visits (all diagnosis and procedural codes needed for the facility and professional fee components). At this time, 25% of all clinic coding has transitioned to SinglePath, while the remaining 75% is still on a hybrid formula of charge tickets and diagnosis abstract by coders. Although E&M services will be almost entirely outpatient-oriented, there is a small population on a monthly basis (roughly 3,000 encounters) for the provision of E&M coding for inpatient professional fee services for UNMH-employed advanced practice professionals that would be within scope as well.

- There are approximately 750,000 outpatient clinic/ancillary services performed annually at UNMH.
 - For this RFP scope, outpatient volumes range from 45,000-50,000 per month. The following are annual estimates:
 - Cardiology – 21,000
 - Dermatology – 16,000
 - Digestive/Gastrointestinal – 9,700
 - Primary Care – 100,000
 - Specialty Clinics (multidisciplinary) – 120,000

- Neurology – 26,000
- Ophthalmology – 22,000
- Pediatrics – 76,000
- Surgery – 25,000
- OBGYN/Women’s & Newborn – 56,000
- Ancillary (audiology, rehab, etc.) – 18,000
- Inpatient Advanced Practice Provider E&M Coding – 35,000

It should be noted that radiology coding would be out of scope for this proposal as it is handled by a separate coding group. With that said, there may be a minimal need for edit resolutions in the billing system at times for some radiology encounters (generally this averages roughly 45 edits a month).

Alongside the above volumes, we have roughly 1,600 providers throughout our organization. The following is a breakdown by specialty of all providers (irrespective of patient type – patient type is difficult as many of our providers are hybrid offering services both on an inpatient and outpatient basis):

- Anesthesiology/Critical Care – 105
- Surgery - 160
- Dental – 6
- Dermatology – 10
- Emergency Medicine – 172
- Family & Community Medicine – 111
- Internal Medicine – 350
- Neurology & Neurosurgery – 83
- Obstetrics & Gynecology - 78
- Ophthalmology – 17
- Orthopedics & Rehab – 50
- Pediatrics – 172
- Radiology – 69
- Psychiatry - 123
- Other - 85

Coders would be expected to demonstrate fluency with the utilization of the 3M system, in terms of both computer-assisted coding functionality, 3M encoder, and all associated 3M reference materials.

Alongside daily coding operations, coders would be expected to clear all associated coding and billing edits that reside in both the facility (Soarian) and professional fee (IDX) systems. In this regard, coders would be expected to be fluent in correct coding initiative (CCI) edits, as well as medically unlikely (MUE) and medical necessity edits, which will require fluency in NCD and LCD policies.

Although the current objective is solely for outsourcing of clinic/ancillary services, there is a potential opportunity that additional coding areas (i.e. facility inpatient, emergency, observation and/or day surgeries) may be outsourced at a later date. As such, vendors may consider this has an option for additional consideration if this need/opportunity arose in the future.

If this expansion took place in the future, coders would be responsible for the accurate assignment of ICD-10-CM diagnosis code(s) and either ICD-10-PCS or CPT procedural codes for the following areas: inpatient, emergency, observation, and day surgery areas (no professional fee component).

- There are approximately 30,000 inpatient admissions annually at UNMH.
- There are over 8,000 observation stays annually at UNMH.
- There are approximately 100,000 emergency visits annually at UNMH.
- There are over 13,000 day surgery visits annually at UNMH.

Position Summary

Vendor would be responsible for furnishing a full-scale coding team to appropriately staff all outpatient clinic and ancillary coding needs of UNMH. Coders would be expected to abstract clinical information from a variety of medical records and assign appropriate codes to patient records according to established procedures. Verify and ensure the accuracy, completeness, specificity and appropriateness of diagnosis codes based on services rendered. Review medical record information to identify all appropriate coding based on ICD-10-CM and CPT/HCPCS classification/terminology code sets. Resolve all outstanding coding and billing edits to ensure accurate and timely submission of claims within established organizational metrics. On average, coding edits range from 8-12,000 edits on a monthly basis. After full transition of coding operation, it is conceivable that denials management/resolution may be passed over to vendor as a responsibility. At this time, coding denials have been largely relegated into the range of Correct Coding Initiative (CCI), Medically Unlikely Edit (MUE) and medical necessity issues; though, missing and/or invalid modifier usage is another common coding denial.

Licensing/Certification Requirements

Coder would be required to possess one of the following credentials:

- Certified Professional Coder (CPC)
- Certified Coding Specialist – Physician-Based (CCS-P)
- Certified Outpatient Coder (COC)
- Certified Coding Specialist (CCS)
- Registered Health Information Administrator (RHIA)
- Registered Health Information Technician (RHIT)

If applicant only earned RHIA or RHIT credential, work experience should indicate at least one-year coding experience.

Staff Competency/ Experience

- Coders must have a minimum of one-year outpatient experience. Prefer experience with an academic facility with multiple specialties, though not required.
- Knowledge of computerized assisted coding (CAC), 3M assisted coding experience, specifically SinglePath preferred.
- Must be knowledgeable and be familiar with the medical terminology, anatomy and physiology, health data requirements and standards, clinical classification and coding systems, data analysis, healthcare reimbursement methods, database security and management, and quality improvement methods.
- Knowledgeable and proficient with 3M Encoder, Electronic Medical Records, and code sets (ICD-10-CM, CPT and HCPCS).
- Knowledge and experience using Cerner Electronic Medical Record preferred.
- Accuracy rate as defined in organization's quality guidelines demonstrated with the company prior to assignment to UNMH
- Ability to work with minimal supervision and utilize time effectively.
- Staff must be able to speak, read and write the English language. Staff should possess good oral and written communication skills, as there may be interactions with medical and/or clinical staff involved in the coding and documentation process.
- Familiarity, and ability to resolve, coding edits.
- Responds to others in an honest, professional and positive manner.
- Respects and follows Hospital specific quality, safety and compliance standards.

Management / Performance Measures

- Coder shall code a minimum number of charts per 8-hour shift as defined in the organization's productivity guidelines.
 - For our outpatient clinics, we have set the following minimum standards:
 - SinglePath Clinics – 6 encounters per hour
 - NonSinglePath Clinics & Edits – 10 encounters/edits per hour
- The expected coding turnaround time is 48 hours (if all documentation is present to code and no other extenuating circumstances with encounter), with the exception of national holidays and weekends).
 - Vendor would be required to ensure that all pended encounters (encounters that could not be coded due to lack of documentation and/or other reasons) would be reviewed on a weekly basis to ensure timely processing after being placed on hold.
 - At this time, our organization is working on additional documentation deficiency protocols. With that said, if documentation is missing, encounters are placed on hold until timely filing deadlines or 90 days (whichever comes sooner).
 - Our organization's expectation is to have all claims issued within five days of date of service (expectation is only held if all documentation is present in the record at the time of coding).
- Coder shall meet quality standards as defined in the organization's quality guidelines.
 - At this time, the department holds a minimum 85% quality expectation; however, the goal is to have all coders within the 90-95% industry standard range.
 - It is an expectation that vendor's coders are completing their annual continuing education units (CEUs) for their respective credentials. It would be advantageous if vendor offers any ongoing continuing education to their coders as well.
- Coder will maintain professional behavior at all times.
- Coder will follow all facility-specific coding policies and procedures.
- If UNMH is not satisfied with the performance of the coder, coder will be removed from account promptly (no later than two weeks from notice).
- Vendor will assign a designated coding manager and/or other liaison to our facility. Vendor will be responsible for monitoring and performing monthly productivity and coding quality audits. Reports will be submitted to UH management on a monthly basis, or more frequently depending on productivity and quality issues identified by either party. Vendor will perform 100% case audits on all new coder activity until accuracy and productivity rate reaches organizational goals for four (4) consecutive weeks or in accordance with vendor's onboarding procedure if agreed to by UNMH. If vendor utilizes a different onboarding plan, UNMH is open to reviewing and determining if vendor's onboarding protocol is acceptable and sufficient. After the initial onboarding period, vendor would need to continue quality audits on all coding staff on a routine, consistent basis.
 - Vendor coding management cannot make any changes to coding organization and/or operations without consent by UNMH.
- Vendor manager will perform monthly audits on each coder's productivity and quality for the remaining duration of assignment to this account; written results will be reported monthly to UNMH Coding management team.
 - There is an expectation that vendor manager may be needed to provide additional reporting if discrepancies and/or issues arise on either facility and/or professional fee coding. There is no expectation at this time that coders would be issuing physician education.
- Organization values quality and productivity as the highest metrics of value; while turnaround time and ongoing coder education are secondary criteria of consideration. Reporting and ongoing communication channels between organization and value will be of high significance as well.

Miscellaneous Information

- No overtime unless mutually agreed upon by vendor and UNMH.
- Vendor to provide remote coders. All should be based in the domestic U.S.
 - UNMH is not interested in any offshore coders at this time for our account.
- Vendor to provide all required hardware for remote coders.
 - UNMH will provide system access for vendor (most likely through secure channels and Citrix) to all necessary systems: 3M for coding software; Soarian Financials and IDX for facility and professional fee billing systems.
 - UNMH strongly values the preservation and security of all patient health information (PHI). UNMH does not desire for vendor to store any PHI and/or other data on individual vendor systems to reduce the unnecessary risk and/or breach of PHI.
 - If vendor does not utilize company-issued computers for coding staff (rather VPN and/or cloud network functionality), this may be allowable. If there are any security considerations and/or concerns on our part, UNMH IT Security will engage with vendor to determine acceptability of current security protocols and system access utilized by vendor.
- Vendor to provide alternate coverage whenever notified in advance of coder's leave and/or other absences.

EXHIBIT K INFORMATION SYSTEMS SECURITY PLAN INFORMATION

The UNMHSC Information Security Plans are to be developed and documented for IT systems, as per the UNMHSC' Information Technology Security Procedures. This template is to be used as a guide in developing individual security plans for new and changing application and infrastructure systems. All projects must also be placed into the Online Request System (ORS) for project prioritization, development and resource review. Purchases, Contracts and Implementation of new IT assets will not move forward without the completion of an IT Security Plan.

- Note to our vendors: your equipment, applications, databases, etc. end up on our environment. All of these must be reviewed for proper resources, security, backup, etc. You must work with the team or project leader to complete the questions below for the most effective and timely implementation.
- The IT Security Plan answers start with the data flow diagram. Without an understanding how the system works and where the application, system or database resides and how the users and support access and support the system is very difficult to answer the following questions.
- **Note:** For confidential or Restricted Data outsourcing the UNMHSC requires all available third party security certifications/attestations (preferably based on standards such as: (ISO 27002, HITRUST, NIST 800-53, SSAE-16 SOC 2, or equivalent) from the vendor that are applicable to the service / application under consideration. For payment card hosting, PCI DSS attestation and reports will be required.
 - If necessary, the vendor can submit a redacted copy of certifications to safeguard sensitive information.
 - The UNMHSC reserves the right to request and review the vendor's third party certifications/attestations annually.
 - Any vendor who also partners with third parties that create, use, transmit, receive or store the UNMHSC data are required to provide independent third party security certifications/attestations.

Important: Start this effort by creating a Visio or other graphical workflow of the system. Include workstation or other device where information is created or accessed mapping through appropriate network areas, include the server/database/application and then diagram return paths if applicable. Finally, map the backup and recovery processes.

A security plan should include at minimum a description of the security processes for the system, access and confidentiality requirements and restrictions, security administration processes, data classification designations, legal requirements for security and privacy, training, security testing, infrastructure security components, roles & responsibilities for security functions, physical security, and back up and disaster recovery requirements. The Security Plan should describe the security needs and processes for the 'Life Cycle Support' of the system.

The Security Plan will be initiated in the early phases (business analysis and requirements) of a project, and completed before the system is migrated to production. This template will be used to document security plans upgrades to current systems as well as for current systems, where such documentation does not exist.
